GASLOG ADOPTS ANOTHER ULYSSES SYSTEMS SHIPPING SOLUTION: DOCUMENT MANAGEMENT

Gaslog, a leading operator and manager of Liquefied natural gas (LNG) carriers adopted Task Assistant Document Management.

Ulysses Systems Shipping Solution for Document Management is the award winning software application designed to assist companies implementing consistent processes that ensure adherence to regulations. In addition the application provides total management support for ship operations, consistent with all safety and quality management requirements and assists office and shipboard staff with inspections by customers and regulatory auditors.

Gaslog has been using Ulysses Management System, Task Assistant since 2007 for their 12 vessels operations on Technical and Purchasing. The 6 years successful collaboration between Gaslog and Ulysses Systems, as well as the increasing need for an economically viable and efficient information management that shipping companies face today, led to the adoption of Document Management for Quality and Safety.

Dimitris Glossiotis, Principal Business Engineer at Ulysses, notes that "Ulysses Systems team is honored when Task Assistant's value is once again acknowledged, especially after years of successful collaboration in Technical and Purchasing departments. We commit in delivering a system which will simplify life onboard and ashore."

About Ulysses Systems

Ulysses develops Task Oriented Software that helps companies evolve and effectively comply with most kinds of managerial self-improvement targets as well as any new external regulations. Ulysses Systems established in 1996 is based in London, with offices in Greece, India, Singapore and the United States. Ulysses roster of clients includes more than 50 shipping companies worldwide.
