R10+ → ProcureShip Integration

Key Features

- TA is now extensible to integrate with multiple eProcurement System.
- From R10+ onwards multiple 3rd Party e-ProcureSystems like ShipServ, ProcureShip can work in parallel in TA.
- System provides user with option to select their choice eProcureSystem Vendor while working on RFQ.
- Once the option is selected, RFQ and PO workflow will happen using the selected eProcuresystem.

User Experience

- Discussion Facility
- New Look
 - Desktop TA – New Workspace UI
 - Web TA

R10+ → Discussion Facility On Purchasing Line Items

Key features

- Generic discussions facility is introduced for the all the users with the necessary permissions to discuss and comment freely during the Purchasing Cycle.
- Discussion on per line item and / or Header Level, which is interactive as it is editable/can be discussed on the any stage of the workflow.
- An extensible design to accommodate requirement of discussion facility on any TA Business Objects

R10+ → New Look TA – Desktop/Web – New Workspace UI

Key points

- New look for desktop and web TA workspace UI
- We have maintained the same success story of our Task Orientation principles and ease of navigations
- Gains
 - Almost Zero Learning Curve for TA Users.
 - Ease of adaptability using web and desktop UI.

Thank you!

Since 1996, Ulysses Systems is a leader in software innovation for the Maritime Industry, providing management solutions to ship-owners and ship managers. Its award winning software, Task Assistant® enables both office and seagoing personnel to work intuitively, efficiently and effectively. Class certified by DNV, Bureau Veritas and ClassNK, Task Assistant® is designed to require minimal training. Managers should expect a fast return on total software lifecycle cost from reliable and mature process optimization and minimization of information gaps.
